### How does Google Street View benefit my business?

Street View appears in Google Search results, Google Maps, and Google+ on a desktop, smartphone or tablet. There are over one billion searches each month on Google Maps. With a finely tuned Google+ Business profile your customers get the right information at the right time, whether it is driving directions to your business in Maps, hours of operations in Search or a phone number they can click to call you on mobile phones. With the addition of Business View they can now tour your business and find a table to reserve, view the items you have for sale, plan events and compare your business with other local listings. Visual advertising is far more effective than alternative styles of advertising. This means that adding Street View to your existing profile on Google yields a far greater chance of success than businesses who have no visual content. As technology and social media continue to expand, it is necessary to meet the growing expectations of the consumer and stay on top of your competition.

### How much does Street View cost?

Your online business profile is Google Maps, Google Search and Google+. Your business profile is hosted free of charge by Google. Street View will be integrated into your current online profile and hosted by Google for free. To participate in Street View however, Google requires the photography and virtual tour to be completed by a Google Trusted Photographer like me (Tilted Media) who has been specially trained by Google.

**Tilted Media's service is broken down into the following packages based on the size of your business:**
